EDUCATION

University of Houston

Bachelor of Science in Computer Science

Houston, TX

Expected: Dec. 2027

- **Honors/Awards:** Excellence Academic Scholarship; Dean's List

EXPERIENCE

Chicago Transit Tracker

Co-Founder/Software Engineer, StartUp

Mar. 2026 – Present

Chicago, IL

- Delivered routing **15% faster** than CTA's official app by building a cross-platform **React Native** app with real-time CTA train, bus, and Metra tracking, benchmarked against 3 competitors (CTA, METRA, Google Maps).
- Unified 3 disparate transit **APIs (CTA Train Tracker, CTA Bus Tracker, Metra GTFS-RT)** into a single REST contract by engineering a **Spring Boot** backend that joins live positions with trip-update data and persists it in **PostgreSQL**.
- Sustained low-latency responses during peak commute hours by implementing **Caffeine** in-memory caching with per-endpoint TTLs, cutting upstream API calls across all 3 feeds.

commit-clothes.com

Co-Founder/Software Engineer, StartUp

May 2026 – Present

Chicago, IL

- Achieved a **28% sell-through rate** on initial inventory by building and launching a full-stack e-commerce platform, donating **5% of profits** to the Greater Chicago Food Depository.
- Processed **1,600+ API requests** since launch by engineering RESTful services in **Java/Spring Boot** over a **PostgreSQL** data model, secured with Spring Security and integrated with **Stripe** for checkout.
- Shipped a responsive **React** frontend with reusable components and centralized state; containerized with **Docker** and deployed to **AWS**.

University of Houston

IT Support, Proctor

Aug. 2026 – Present

Houston, TX

- Supported **1,000+ students daily** by managing secure check-in and **LockDown/CASA Secure Browser** access, resolving **password reset, authentication, authorization, and network** issues.

PROJECTS

StockMindAI | Next.js, TypeScript, MongoDB, Finnhub API, Gemini API, TradingView, Inngest

Aug. 2026

- Built a full-stack stock tracking app with **Next.js/TypeScript**, implementing auth with **better-auth**, **MongoDB**, and middleware-based route protection.
- Integrated the **Finnhub API** for stock search/news and embedded **TradingView** widgets for real-time market overviews, heatmaps, and candlestick charts.
- Implemented event-driven background jobs with **Inngest**, using the **Gemini API** to generate AI market summaries emailed via **Nodemailer**.

AIClinic | React, Node.js/Express, PostgreSQL, Python, OpenAI API

Dec. 2025

- Built a self-hosted diagnostic tool collecting live **CPU, RAM, disk, GPU, and network** telemetry via a **Python** agent, surfacing bottlenecks through a **React** dashboard backed by **Node.js/Express** and **PostgreSQL**.
- Designed a vendor-adapter GPU collector supporting **NVIDIA (NVML)**, **AMD**, and **Intel** hardware, with fallback to Windows Performance Counters and a 7-rule diagnostic engine validated by automated tests.
- Implemented z-score anomaly detection against each machine's own baseline, then integrated the **OpenAI API** so users get plain-language explanations instead of raw metrics.

CI/CD Pipeline for Production-Ready API | Docker, Kubernetes, GitHub Actions, Node.js, PostgreSQL

May 2026

- Built a containerized REST API with **Node.js/Express**, **Neon Postgres**, and **Drizzle ORM**, implementing request validation with **Zod** and rate limiting/security with **Arcjet**.
- Automated linting, **Jest** testing, and **Docker** image builds with a **GitHub Actions** CI/CD pipeline, deploying to **Kubernetes** with rolling updates.

LEADERSHIP

University of Houston

Team Lead, Airline Ticketing System Project

Aug. 2026 – Present

Houston, TX

- Led a **team of 5** to design and build a **full-stack** Airline Ticketing System with flight search, booking, cancellation/modification, and payment processing for domestic and international routes.
- Mentored team members with no prior full-stack experience on frontend, backend, and database development while directing sprint planning and code reviews.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript/JavaScript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: React, React Native, Next.js, Node.js/Express, Spring Boot, Spring Security

Databases & ORMs: PostgreSQL, MongoDB, Neon Postgres, Drizzle ORM

Developer Tools & Cloud: GitHub, Docker, Kubernetes, AWS, GitHub Actions, REST APIs, better-auth
